

Tilted Element Transducer

Flush Housing with Built-In Deadrise Compensation

- All the benefits of a flush mounted housing:
 - no fairing
 - minimal drag
- Ensures vertical beam for:
 - accurate depth performance
 - excellent echo return at high speed
- Two separate models:
 - 12° tilted version
(for 8° to 15° deadrise)
 - 20° tilted version
(for 16° to 24° deadrise)
- Available in depth only
or depth & temperature.
- Right angle cable exit
protects transducer
cable from damage.
